SUMMARY

Backend Software Engineer with experience in building high-throughput microservices and distributed systems. Specializes in modern Java and Spring Boot, with a strong track record of optimizing backend performance, driving complex legacy-to-modern migrations, and deploying resilient cloud-native solutions using AWS, Docker, and Kubernetes.

SKILLS

Technical Skills Java, Springboot, Microservices, Hibernate, JPA, AWS, Docker, Kubernetes, SQL, Python, Junit, Mockito, JS, HTML, CSS, Github Copilot. Chatgpt Codex

EXPERIENCE

Software Engineer Mar 2025 - Oct 2026
GoDigit General Insurance *Kochi, IN*

- Integrated new partner for claim intimation and creation.
- Developed a new feature that enables customers to understand drug-related insights, helping them understand harmful drug combinations and safe drug combinations.
- Orchestrated the migration of microservices from Java 11 to 21, leveraging modern language features to optimize system performance.
- Implemented event-driven internal features for Motor Pre-Inspection and Endorsement services, seamlessly orchestrating third-party API integrations (MoEngage) based on lifecycle changes.
- Leverage AI-assisted development (GitHub Copilot) to accelerate sprint velocity, automate boilerplate generation, and maintain high code quality with Junit/Mockito

Software Engineer Jun 2023 - Feb 2025
iTujar *Kochi, IN*

- Spearheaded the end-to-end development of a custom Java SDK for ZATCA e-invoicing, positioning the company as an early-market leader and directly contributing to a 12% increase in enterprise client acquisition in the first 3 months.
- Led the end-to-end development, including designing, coding, testing, and deploying new micro services that previously worked in a monolithic architecture, increasing the efficiency and throughput noticeably.
- Designed and deployed robust RESTful APIs to ensure 100% regulatory compliance for electronic billing, significantly reducing manual tax filing errors for end-users.
- Containerized applications using Docker, handled deployments.

Software Engineer Sep 2021 - Jun 2023
Dexlock *Kochi, IN*

- Developed RESTful APIs in Java Spring Boot, ensuring efficient and secure data communication between clients and server.
- Designed and implemented a custom kylinpy module, and JDBC driver to meet project-specific requirements, enhancing data processing and analytics capabilities.

EDUCATION

B.Tech - Information Technology, APJ Abdul Kalam KTU 2016 - 2020 CGPA: 7.16.
